About Natural Pigments

Natural Pigments Inc. is a manufacturer of fine artists materials for professionals. Natural Pigments was founded in 2003 as a manufacturer and importer of rare and historical pigments and artists materials. In 2005, Natural Pigments began making artists' oils and based on these rare materials. Ceracolors, a water-based wax paint was introduced in 2014.

What Makes Rublev Colours Unique?

Rublev Colours are different from other commercial oil colors. One reason is we use natural and historical pigments like those used by the old masters. Another is we make them as they did before modern oil colors—without additives.

Rublev Colours are formulated to maintain the unique characteristics of each pigment in oil. What you find in each tube is unique due to the pigment inside, giving you new choices of texture, opacity, consistency, tone and hue. With Rublev Colours you experience the transparency of yellow ocher, the pale cool-

ness of green earths, and the crystalline glitter of blue lazurite.

Color Particle by Particle

The particles of natural pigments are larger and more varied than pigments in modern artists' oil colors. When we remember how crystalline pigments, such as azurite, malachite, lazurite, were used in old masters' paintings, it is easy to understand how these beautiful surfaces with broken lights were obtained. An examination, for instance, of lazurite particles under the microscope at once reveals the beautiful mass of blue and blue-green crystals, reflecting light in all directions, and thus of course enhancing the visual effect.

No Additives

Rublev Colours do not contain additives, such as fillers, driers and stabilizers—simply pigment and oil. We use linseed oil in our paint sometimes with a small amount of heat-bodied linseed oil. Stabilizers, such as stearates and waxes that diminish the individual effects of pigments are not added. You will find different consistencies from color to color due to the characteristics of individual pigments. Some colors brush out long, others short and buttery and most are thixotropic.

Overall, Rublev Colours have longer brushing consistency than most tube colors today, making them ideal for both bristle and soft-hair brushes in fine rendering on both fine-weave canvas and smooth panels.

Single Pigment Colors

When you see a color name on our label, you get just that—one pure pigment. For example, Rublev Colours Vermilion is not a hue, but the pure pigment—red mercuric sulfide. In a tube of Rublev Colours Verona Green Earth you will not find a mixture of pigments, but the real thing—green earth. And Rublev Colours Naples Yellow is pure lead antimonate. You won't even find the word "genuine" used to describe Rublev Colours, because all colors are simply that—genuine.

All our earth colors have outstanding lightfastness and most other colors are permanent when used full strength. Rublev Colours offer an extraordinary range of tinting strength and an immense diversity between opacity and transparency, as well as texture—from smooth, fine grained to grainy.

Meticulously Crafted

We make Rublev Colours in small batches, meticulously crafting each color. Using natural mineral and historical pigments means that we must take extra steps to prepare these colors into a useable paint, typically not required for modern synthetic pigments. All this requires more time and labor to make a finished product that is different from all other oil color brands—a difference you can clearly see and palpably feel.

How Rublev Colours Are Made

From our extensive experience with pigments, we select those that not only make good colors in oil, but provide a diverse range of texture, body and opacity. We then prepare each pigment by baking them in low-

temperature ovens for a day to remove all traces of adsorbed moisture.

Next, we mix the pigment with a blend of oil, typically linseed, in mixers or, in the case of some mineral pigments, in edge runners resembling old-fashioned stone mills to obtain a dense, homogenous mixture. The paste, called a 'premix', is allowed to 'sweat' overnight or longer before grinding.

The paste is ground on three-roll mills made of granite or chilled cast steel rolls. We grind each color at least 3 to 4 times—each time reducing the gap between the rolls to apply greater pressure on the paste. We grind our paints more times than other manufacturers, because we do not use stabilizers that, while making paint easier to grind, alter the body and consistency of the paint. Often colors are ground 6 to 8 times before we consider them ready. We age the batch for several months and then regrind.

Finally, we check each batch for tinting strength, consistency and density before filling into tubes.

Terms and Conditions

Pricing

Prices are effective April 1, 2024. All prices are FOB shipping point and are subject to change without notice.

Due to fluctuations in the exchange rates of foreign currency, some of our prices may change during the year. We will let established account customers know with at least 30 days notice of when a change will occur.

Natural Pigments is committed to maintaining the value of our brands. To ensure this value, we require our customers to sell our artists materials at prices that reflect their value. Toward this goal we have established a Minimum Advertised Price (MAP) policy: all products may not be advertised at prices lower than 10% off. Please consult our MAP policy for details.

Initial Order and Minimum Orders

We require a minimum initial order of \$1,000 net. Minimum reorder amount is \$500 net.

Payment

Payment is accepted by credit card (MasterCard or Visa), PayPal, check drawn on a U.S. bank in U.S. Dollars, or wire transfer to the Natural Pigments bank account in U.S. Dollars. A convenience fee for payments by credit card will be charged 3% on the total amount of the invoice. We do not accept Cash On Delivery (COD) orders.

New Accounts

To establish a credit account with Natural Pigments, we require an initial order paid in advance and an approved credit application. THE FIRST ORDER MUST BE PAID IN ADVANCE. Allow at least two weeks to establish a credit account after we receive your completed credit application.

Terms

Invoices on approved accounts are due and payable within thirty (30) days from the invoice date. A 1.5% finance charge is added monthly to invoices not paid within thirty (30) days.

Order Processing

To help ensure proper processing of your order please be sure to include product code numbers (SKUs), quantity, description and discounts. Any special pricing or promotional pricing must be indicated on your purchase order. Customers will be responsible for expenses due to order errors made by them. Orders will not be processed on accounts with overdue invoices.

Standard Packaging

All products are sold in standard packaging quantities as detailed in our price list. We reserve the right to adjust quantities to the minimum order quantity (MOQ) of the item.

Backorders

Natural Pigments does not backorder out of stock merchandise.

Special Orders

Special orders (items and/or quantities that we do not regularly stock) require a minimum order of \$1,000 net and a 50% deposit at the time of order. The balance payment is due upon delivery. Special orders cannot be cancelled after the deposit has been received and the merchandise cannot be returned. Deposits will not be refunded. Special orders will not be placed with the supplier until the deposit is received. Special orders will be added to our regular import or production schedule, so please allow approximately 90 days for delivery. All freight charges for special orders are the responsibility of the customer.

Displays and Fixtures

There is no charge for certain displays when ordered at the same time as the minimum stocking order of products for that display and when used to merchandise our products. Natural Pigments retains ownership of the displays and fixtures so they are sent to stores on loan. Customers are responsible for freight charges for displays. Displays and fixtures are for the exclusive use of Natural Pigments products. No other brands can be presented in the displays.

IF DISPLAYS ARE SHIPPED WITHOUT PRODUCTS, THEY WILL BE BILLED AT THE NET PRICE. If a store damages a display or any part of a display or fixture and orders replacements, all parts will be charged at the net price.

Freight Policy

All shipments are FOB shipping point, freight prepaid (FCA shipping point, Incoterms 2000), unless the customer makes other arrangements in advance. Shipments will be made by the most dependable and economical carrier.

Natural Pigments will make every effort to comply with customer-specified carriers. Additional charges,

such as guaranteed time of day, in store delivery, lift gate requirement, etc., will be at the customer's expense.

Shipments

Signing for Shipments

Always inspect your shipment. If receiving your shipment on pallets, always sign for the total number of cartons. The number of pallets and total number of cartons should be indicated on the shipping paperwork. For example, a shipment arrives on two pallets containing 28 cartons. Be sure to count the cartons in the shipment, note any shortage if applicable, and always sign the carton count. No claims will be accepted when you sign for pallets that are missing cartons. If unable to count cartons, sign "Subject to count and inspection."

Shortages

Count the cartons that you sign for. If a freight carrier loses cartons, it is their responsibility to pay for the loss and your responsibility to file a claim. If the order is a drop shipment, explain in advance to your customer that it is their responsibility to count the cartons and sign for only the number received. Shortages must be reported at the time of receipt.

Claims for missing merchandise in your shipment (other than missing cartons) must be made with Natural Pigments within 48 hours of receipt of merchandise. The burden of proof is on the customer to substantiate the claim. All claims must include our invoice number and date.

Damages

If you receive cartons that have any exterior damage, you must note the damage on the shipping paperwork at the time of receipt. If a freight carrier damages cartons, it is their responsibility to pay for the damages and your responsibility to file a claim. Claims for damaged merchandise must be made with the freight carrier. Damages must be reported at the time you receive the shipment.

Once the shipment has been signed as received in good condition, freight carriers will consider such as proof of delivery without visible damage. Any other claims of damage and shortages must be done with forty-eight (48) hours of receipt of merchandise.

Return Policy

Returns must be authorized by Natural Pigments in advance and are subject to 20% restocking fee. Returns must be in re-sellable condition. Credit will not be given for shop worn, discontinued, special order, promotional or closeout merchandise. All price stickers must be removed before the product is returned. No returns will be accepted after 30 days from the invoice date.

We will not accept return merchandise unless it has an authorization number printed boldly on the carton. Please contact our customer service, and if approved they will provide you a Return Authorization number.

Payment deductions on outstanding invoices for damaged merchandise, missing merchandise or returned merchandise are not allowed. Natural Pigments will issue a credit memo for the amount that may be deducted from outstanding invoices.

Minimum Advertised Price (MAP)

The minimum advertised price (hereinafter "MAP") is the MSRP for each product as set forth in the Price Guide, effective on the date set forth therein. Natural Pigments has established the minimum advertised price for all products referenced and may adjust both the minimum advertised price, and the products subject to the MAP, in its sole discretion, upon reasonable notice to Dealers.

The Minimum Advertised Price shall be no less than ten percent (10%) off the Manufacturer's Suggested Resale Price (MSRP). Calculation Example: An item with an MSRP of \$44.95 minus 10% off is \$40.46. The lowest advertised price to be compliant with the MAP policy would be \$40.46.

The MAP shall apply to all advertisements of products in any and all media, including, without limitation, flyers, posters, coupons, mailers, insert, newspapers, magazines, catalogs, mail order catalogs, internet or similar electronic media, including websites, email newsletters, email solicitations, television, radio and public signage.

The MAP is not applicable to any in-store advertising that is displayed only in the store and not distributed to or available to any customer to remove from the store. Window signage and banners visible to street traffic and shoppers outside the store itself are considered advertising under the MAP. In-store displays, point-of-sale signs, hangtags or similar marks on products or product packaging that merely state the price are not considered advertising for purposes of the MAP. Similarly, the MAP does not apply to the actual sales price on any check out page or shopping cart page of any Dealer's website or related internet site (typically the page at which the end user finally purchases the product).

USMCA (formerly NAFTA)

The terms of the United States-Mexico-Canada Agreement (USMCA) which replaced the North American Free Trade Agreement (NAFTA) applies to all brand name products.
